## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/10/06 has been entered.

### *Claim Rejections - 35 USC 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

*A person shall be entitled to a patent unless --  
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.*

3. Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Gagnon et al. (U.S. Patent No. 6,522,342 B1).

Regarding claims 1 and 23, Gagnon teaches a receiver for a digital video service network, the receiver comprising means for receiving a digital television signal broadcast by a broadcaster over a transmission medium (Fig. 1 and col. 8/line 36 to col. 9/line 29); and the digital signal

including a preview program and broadcasting schedule information, wherein both the preview program and the broadcasting schedule relating to a main program (Figs. 5-7 & 10-11, and col. 17/lines 15-55 for preview program); means for decoding the digital television signal (col. 25/line 48 to col. 26/line 63 for details on the receiver for decoding the digital signal); means for providing an output signal reflective of the preview program for display; and wherein the preview program and the broadcast schedule information is received simultaneously at the receiver for displaying (as shown in Figs. 2A, 9, 11 and col. 10/line 50 to col. 12/line 25 for GUI and displaying concerned).

For claims 2, 3 and 4, Gagnon teaches these known features for receiving digital signal and extracting bit streams as well as TS demultiplexer for outputs preview and broadcast schedule information (col. 25/line 60 to col. 26/line 36 & Figs. 2A, 5-6, 9, 11).

For claim 5, Gagnon teaches a data manager as a system manager for handling the control task for directing the stream flow of data from the digital television signal (refer to Fig. 23 and col. 27/line 35 to col. 28/line 8).

For claims 6-8, Gagnon teaches these know feature of a digital storage device, application decoders for decoding audio/video bit streams (Figs. 22/item 434 for video/audio decoder; Fig. 23/item 540 for storage), and for generating an icon to overlay the video output of the decoded video signal during display (Fig. 23/items 506 & 508 for video mpeg driver and video VGA driver for outputting the display; and as shown in Fig. 9 for a plurality of icons in preview program sections).

Art Unit: 2623

For claims 9-12 and 24, Gagnon teaches means for downloading the broadcasting schedule information while the preview being decoded and displayed including describing main program, a channel number and a start time (Figs. 10-12, and col. 15/line 30 to col. 16/line 55; and Figs. 32a-32b & col. 36/lines 15-42 for an example of checking and comparing the clock with start times of broadcast programs).

For claims 13-22, these claims, with similar features and methods as noted earlier and further addressing MPEG2 for digital signal (Gagnon teaches on col. 26/line 65 to col. 27/line 24 for MPEG digital signal), are rejected for the reasons given as discussed in claims 1-12 and 23-24 above.
